PROFESSIONAL EXPERIENCE

HOME HEALTH RESOURCE GROUP SERVICES INC.

Angeles City, Pampanga

Junior Full Stack Developer

Aug 2025 - Present

- Developed **full-stack applications** with **Node.js** (Angular.js, React.js, and Express.js) delivering scalable UI and maintainable backend architecture
- Worked in **Agile teams** using Git/GitHub, contributing to feature delivery, bug fixes, and **CI/CD workflows** in healthcare/compliance systems
- Created **RESTful APIs** and **JWT/session-based authentication**, ensuring secure and reliable system integrations
- Optimized **CRUD operations** and **SQL/ORM queries** for data integrity and performance
- Applied **clean architecture principles** (such as DRY) and created reusable components to improve code quality
- Contributed to healthcare-related systems, handling **sensitive data with security and reliability considerations**
- Improved system performance through **debugging, refactoring, and optimization**

QSTRIKE INNOVATIONS PHILS., OPC

San Fernando, Pampanga

Software Engineer Intern

Feb 2025 - May 2025

- Built an **interactive dashboard application** and contributed to data analytics system using **Vue.js**, enabling dynamic visualization of key metrics in a responsive interface
- Created frontend components and managed application **state and routing**, enhancing user interactions and data presentation
- Integrated APIs and asynchronous data handling to support real-time dashboard updates
- Applied best practices in modular component design, improving code maintainability and reusability
- Collaborated with team members and followed version control workflows using **Git/GitHub**

GRAPHIC ARTIST (FREELANCE)

Angeles City, Pampanga

Projects Summary

2024 - Feb 2025

- Designed logos, custom t-shirt graphics, marketing materials, and digital content for local businesses, clients, and a local church, delivering high-quality, print-ready assets.

EDUCATION

CITY COLLEGE OF ANGELES

Angeles City, Pampanga

Bachelor's Degree in Computer Science

May 2025

Thesis: [GrammarLeap: A Web-Based Grammar Practice Tool Integrating Gamification](#)

PROJECTS

HOME HEALTH OVERALL COMPLIANCE SYSTEM (ongoing)

(HHRG Services)

- **Developed a healthcare compliance system** tailored to business needs, reducing paper documentation and streamlining patient admissions, employee information, and data management (CRUD).

Tech Stack: React.js, Tanstack, Drizzle ORM, PostgreSQL, Typescript, Javascript, HTML, CSS, Tailwind CSS

HEALTH CONNECT PRO

(HHRG Services)

- Contributed to full-stack development, handling frontend and backend features for nurse patient visits, payslip management, patient data handling, and interactive dashboards, improving operational efficiency and data accuracy.
- Supported implementation of RQAT and reporting tools, enabling actionable insights and smoother workflow management for healthcare staff.

Tech Stack: Angular.js, TypeScript, HTML, CSS, Javascript, PrimeNG, PrimeFlex, Node.js, MSSQL, Express.js

HEALTH CONNECT ANALYTICS

(HHRG Services)

- Developed analytics dashboards and reporting tools for home health operations, tracking key metrics in patient care, billing, and resource management, etc. Implemented data visualization and business insights features, enabling decision-making improvements across departments.

Tech Stack: Angular.js, TypeScript, HTML, CSS, Javascript, PrimeNG, PrimeFlex, Node.js, MSSQL, Express.js

SIMPLY NOTES

(HHRG Skill-Building Project)

- Developed notes application, focused on CRUD and UI for creating and managing user notes in a single-page web interface. Learned Angular app structure and tooling, including development server, components, and TypeScript-based modules for scalability and maintainability.

Tech Stack: Angular.js, TypeScript, HTML, CSS, Javascript, PrimeNG, PrimeFlex, Node.js

Github Link: github.com/naldwin/simply-notes

PROLOOK DASHBOARD

(Internship Skill-Building Project)

- Developed interactive dashboard frontend UI, including responsive layouts, animated transitions, and sound effects to enhance user engagement and usability.
- Implemented user authentication and real-time data visualization features connecting to external APIs, with secure login flows and dynamic content updates.

Tech Stack: Vue.js, Node.js, Pinia/Vue Router, Axios, Javascript, Chart.js, UIKit

Github Link: github.com/naldwin/Dashboard-Qstrike

GRAMMARLEAP

(Thesis Project)

- Developed core application features for an educational web platform that makes grammar learning interactive and gamified (e.g., games, leveling, quizzes, missions, and progressive exams).
- Integrated natural language processing for automated grammar checking and user feedback to enhance learning effectiveness and user engagement.

Tech Stack: Laravel PHP, JavaScript, Vite, Node.js, MySQL, Javascript NLP library, HTML, CSS

Github Link: github.com/naldwin/GrammarLeap-Defended

SKILLS SUMMARY

Technical Skills: JavaScript, TypeScript, PHP, HTML, CSS, SQL, React.js, Angular.js, Vue.js, Tailwind CSS, PrimeNG, PrimeFlex, UIKit, Node.js, Express.js, Laravel PHP, Drizzle ORM, PostgreSQL, MySQL, MSSQL, Git

Creative Skills: Figma, Adobe Illustrator, Canva, Capcut
